President." If we ask this same man for a list of the necessary qualifications for that position, they will be summed up-in the the word " Statzamanship" -- and his beau ideal will be some mouthing Demagogue, who traverses the country, impelled by ambition. A talent for stump speaking in the minds of the few may be a supreme qualification, but it is demonstratably true that Statesmanship and a talent for stump speaking are almost always antagonistical. To be a successful "Stumper," one must have a certain kind of ready wit, a general knowledge of politics, a good memory, inent oratory and a strong voice : one must know how to use clap trap so as to ignite what is called the "enthusiasm of the masses" and what has all this to do with Statesmanship? Washington or Jerrenson never could have occupied the stump with

They not only lacked the fluency of the demagogue, but they were too inflexible, too dominant in their own integrity, to fawn and scrape before sections and factions, covering here a doubtful point, and there denying it in toto. The general mistake of the present day seems to be in demanding only intellectual qualifications for a President.

The glaring lesson of the past, teaching us that the most useful and successful Presidents were virtuous, were men of sterling integrity, is overlocked, and partizans busy themselves in hunting up evidences of smartness, as though the Executive Chair was to be filled by a political speculator.

If the sober wisdom of the people, uninfluenced by party considerations, were to select a man to occupy the position of President, the selection would undoubtedly be made with a due regard to the moral charnoter of the man; his judgment would be more conspicuous than his passion; his selves journeying south towards Csiro, inbroad comprehensive views, his inflexibility stead of west towards Quinay. How different the character of LINCOLN. Brief addresses were made to the assembled multitude by Senator Seward, Mr. ADAMS and Gen. NYE; and after twenty minutes' stop, we were once again in motion. It was fortunate for the distinguished gentlemen of the party, that they ourneyed through Illinois by night. A Suggestion to Milwankee. We copy below a letter in regard to one of the most important enterprises in our city. With a short line of road running Southwest, we should connect, and tap every road We understand that about \$100,000 of subscriptious would complete this Milwaukee & Northern Illinois R. R., and we hazard nothing in saying, that no act of Milwaukee would so completely counteract the Chicago & North-western road, as that. We could take more from liliuois in a day with our week with hers. With this road finished, we could laugh at any attempts to rob us of our legitimate trade. Will not some one make an earnest move in this important matter?

Copy of a letter from a merchant in Rich mond, McHenry Co., Ill., to a gentleman in this city:

will even do more, if they can have the road. The Kenesha and Rockford road will be completed through this full, "a sure thing." The cars are now running to Genoa and doing a good freighting business. If Kenoaha onn build a Ratiroad at this time, blilwau-

kee certainly can. Our road takes to Chicago, daily, from 18 to 20 car loads of grain, at the low prices even. You can see by the Chicago papers that nearly one-half the reesipts of wheat are from the Galena road; a large portion of which would go to your city if it could get there. I believe we can this fall, if you will meet us there. Talk the matter up and see if there is any spirit in Milwaukee to do anything. You say you are Railroad poor. I fear you will be much poorer if you don't take hold of this Road, to enable you to get your chare of the business of this rich country."

Perilons Balloon Descent. ALBANY, September 23. Prof. La Mountain, the eronaut, met with serious accident on his recent royage from this city. He traveled thirty miles in twen-ty-nine minutes, and in attempting to land at East Jonesboro, Mass., was caught in a tornado and dashed against a stone wall, knocking him senseless, but breaking no bones. The basket rebounded, and was ele-vated to equal attitude with the balloon thus learing the wall. It was dragged along the ground at a fearful speed, and coming in contact with a tree, stripped it of its brauch-es and tore the net work of the balloon to this city:

"There seems at this time a great demand for the Milwaukee and Northern Illinois Railroad. The people in this vicinity are very much excited on the subject and are exceedingly anxious that it should be built. If properly managed, large subscriptions can be procured from new men, and the old subscribers say they are ready to pay up and will even do more if they can have the read, when it came in contact with another tree, throwing Mr. L. out and causing the balloon to collapse and tearing it to tatters. La Mountain was not conscious for nearly half an hour, when he was found on the top of a mountain by some men who witnessed his perilous descent. He was badly bruised and cut, but not so dangerously bruised as to prevent his riding to a farmer's house, when where he remained twenty-four hours, when he returned to Lausingburg, reaching home last night. His escape from instant death man light. Dis estable from instant wath was most miraculous, as the indicon was driven along at the rate of a mile a minute when he was dashed against the stone wall- He soys it was a more fearful and perilous descent than was made when he lauded in

Think of it as you step on the gang plank, travelers and excursionists—sudden death, widows, orphaus, desolation wide and deep—all for the want of \$500, spent in bulkheads. Five hundred dollars would have saved the Lady Eigin—saved three hundred lives—saved crushing a thousand hearts. But it would have been five bundred elwighty dollars, and the Lady hundred almighty dollars, and the Lady hundred almighty dollars, and the Lady Elgin would not have afforded dinners and berths to quite so many people at the least possible cost. There are certainly two sides to this story."

THE PRINCE OF WALES GOING SOUTH Twenty five gentlemen from the Southern States, headed by the Hon, H. W. Hilliard of Montgomery, Ala, have written to Lord Lyons, British Ambassador at Washington, setting forth their respect for Queen Victoria and expressing the pleasure which a visit from the Prince of Wales to the Southern States would afford them. In his reply, written from Toronto, Lorp

Lyons says:
His Royal Highness regrets extremely that the shortness of the time which he has at his disposal renders it impossible for him to visit, upon this occasion, the Southern portions of the United States. His Royal Highness liones to be able to go to Richmond, in Virginia, but he is so much pressed for time that he will be unabled to extend his tour

Inat no will be unkneed to extend his tour further South.

In fact, the necessity of His Royal High-ness being in England by the end of next month, at latest, precludes his being able to prolong his stay in the United States until the season when traveling in the South be-comes healthy to European constitutions. ### THE LADY IN WHITE.

BY ANSON O, CHESTES. Is it a bride that I acc?
Gods! she is wondrously fair ! Gode! she is wondrously late Blue as the sky is her eye, Golden as sunrise her hair; Over her beautiful brow Elippies its glorious light— Gods! she is wondrously fair! She who is clad in white.

Is it a nun that I see,
Fresh from her cloister so gray?
Rappy the priest who is made
Father-confessor to-day!
Would I could stand at his side,
Rob him of hearing and sight!
Ab! she should tell me a tale,
Sho who is clad in white.

Is it an ange! I see,
Sent from the kingdom above?
Surely its errand is Pesce,
Sarely its mission is Love;
Where are its gorsance wings?
Where is its coronet bright?
Ah! she's an angel of earth—
She who is clad in white.,

Tis not a bride that I see,
Though she is peerleasly far;
Tis not a nou that I see,
Weary with penutoe and prayer;
Win not an ange! I see,
Glowing with beauty and light,
Sent from the kingdom above—
Yet is she clad in white!

How to Swim in a Surf. At the meeting of the Academy of Science, on Tuesday evening, an interesting discussion was had upon the method of swimming safely in a surf, and from practiced swimmers present the following facts were elicted:

Waves in deep water are usually smooth that the transfer as the a swimmer, or person Waves in deep water are usually smooth at the top, so that a swimmer, or person floating upon a plank, has no difficulty in keeping up, being gently lifted by the waves, and then setting quintly as they pass by.—Hence, those who escaped being carried down at the sinking of the Lady Eigin, had comparatively little trouble in floating away upon pieces of the wreck. But as the waves a tracked the shellow water at the heach

approach the shallow water at the beach, they under go a change. They become high er and sharper at the orest, and the sum mits moving faster than the bases topple over forwards in a continuous cataract or "comb," and the waves in this form are significantly called "breakers." It is this roaring crest which overwhelm-It is this rearing crest which everwhelmed and drowned so many men in the late disaster, within twenty rods of shore, after having floated safely for miles in the deep water. Now, it cupit to be known to all that, with a little intelligent care, there is no difficulty in swimming through the worst hreakers ever raised on Lake Michigan. To this and a little previous watering in surf-

hreakers ever raised on Lake Michigan. To this end, a little previous practice in surf swimming is an undoubted advantage, but by no means indispensable. Any tolerable swimmer, if he will note the following points, can reach the shore in Lake Michigan without help, and if he is not a swimmer, he can do it with the help of a board, or other means of keeping him afloat, in spite of the breakers:

1st. The person must maintain such a po lst. The person must maintain such a poeition as to see the waves as they approach.
This is done by swimming obliquely towards the shore, so as to keep an eye to
windward; or, the person may face boldly
out, and trust to the propulsion of the
waves to bring him to the beach. If he at
tempt to swim straight before the breakers,
without looking behind him, he will be
taken unawares by the "combing" of the
swells, and strangled by taking in water.
2d. He must understand that his head
will be momentarily covered with water and will be momentarily covered with water and foam at every passage of a crest, but this is of no consequence whatever, if the person is aware of its coming, and holds his breath is aware of its coming, and holds his breath at the instant of his passage. The crests are from ten to fifteen rods apart, and the water between them; is as smooth as could be desired. All that is required then, is that the swimmer, without being alarmed at the frightful appearance of the waves, keeps coolly on his coarse watching their approach. As he rises upon a wave, he will see a roaring cataract three or four feet high, rushing toward him as though it threatened destruction; but if he holds his breath a moment, the creat will pass harmless over him, and

ing cataract three or four feet high, rushing toward him as though it threatened destruction; but if he holds his breath a moment, the creat will pass harmless over thim, and in mistant he will find himself on the windward slope of the wave, perfectly safe and induces a fear of death by sufficially, that is perfectly herrible. Now, here is a specific which forthwith removes the most pa inti symptoms, which always in the end effects a cure. Not to reserve it is madness, for whooping cough it is atso infallable.

At the Republican primary elections held in San Francisco on the 8th, ten out of twelve wards decided against making partizam nominations for local officers, and in favor of an alliance with the People's party to the requiring election in the municipal election.

The Breckinridge State Convention is in session at Sacramento. An electoral ticket will undoubtedly be nominated, as many of that party believe the State can be carried

that party believe the State can be carried for Breckinridge.

Sufficient census returns are made to the Marshal to form a basis for estimating the population of California at 500,000.

A silver excitement has been brewing in Oregon for several months, and most extravagant rumors new prevail respecting mines in different parts of the Cascade mountains, bordering on the Williamette valley.

### LATEST NEWS!

BY LAST NIGHT'S REPORT

Additional Foreign News-CAPE RACE, Sept. 26-9 P. M. RUSSIA AND AUSTRIA.—An interview between the Emperors of Russia and Austria and the Prince Regent of Prussia, takes place at Warsaw, on the 1st of October. Le Nord says that the statement of an alliance between England, Austria and Prussia is false, as far as Austria is concerned. STRIA.—The French army is still encamped at Beyrout. No disturbances had

taken place.

The arrival of the prisoners at Constantinople had excited the populace.
CHINA.—The delays caused by the French were still a matter of complaint. Trouble was expected at Canton, should the Allies

receive a check in the North.

The Rebels had taken possession of the city of Low-Kiang, only 25 miles distant from Shanghai.

INDIA.—All fears of famine in the north-west district of India, had passed away.— Abundant rains had fallen, and there was every prospect of an average crop.

Capture of Slavers. Norrolk, Sept. 26—9 P. M.
A brig, name unknown, but supposed to
be the Storm King, has arrived here in
charge of Lieut. A. K. Hughes, U. S. N.,
3i days from Monrovia. She was captured
by the steamer San Jacinto, Sth. Aug., 200 miles off the Congo River, with 619 negeoes on board, who were landed at Monrovia.

An Incentous Whirtlan .-- While at the Fair grounds this morning we saw some very ingenious specimens of mechanism, in the form of clocks, made by bar. John Muir, of mechanism and the same of the same Marquette County. They were without cases, and were whittled out of pine wood. The wheels moved wich beautiful evenness. One registered not only the hours but the minutes, seconds and days of the month.

The other was in the shape of a soythe, the
wheels being ranged along the part representing the brade. It was hing in a dwarf senting the chang. If was fining in a burroak very tastefully ornamented with moss about its roots. We will venture to predict that few articles will attract as much attention as these products of Mr. Mair's ingenuity.—Madison Journal.

S. Economist, after quoting the remarks of the Mark Lane Express, (published in this paper a few days ago) in which it is stated that the crops in England were better than was anticipated, comments as fol-

"It is not to be disputed that these facts materially narrow the ground on which an anticipation has been based in this country of a large export of breadstiffs to Great Britain; and yet it must be admitted as possible, and even probable that the general result of the Britain and pret it must be admitted as possible, and even probable that the general result of the Britain and the profession of grain to supply its dedictencies.

Those familiar with English agriculture are awars that a harvest begun after the first week of September is generally attended with a great deal of damage to grain; and it is, therefore, most likely that before the lapse of a mouth we gith; hear of a considerable amount of spronting. Busides, the fact is not to be lost sight of that the heavy rains have either standed or destroyed the growth of the crops in the low, we lands, which will materially lessen the total gield. The prospect still is, then, that the crop will be below an average extent, and that its condition will not be generally good; add to which the fact that whilst the potato crop in Ireland and Scotland is likely to prove better than was feared, yet in England it it regarded as an entire failure.

The probability appears to be that whatever surplus grain we may have in this country will find a market of Care Strizie. Thoughout the control of the

LA CROSSE, TREMPELEAU & PRESCOTT RAILBOAD. A large meeting was held at Winous on Saturday night to take into consideration the best method of procuring means to commence the construction of the Eastern connection Railroad.

T. Simyson, Esq., as one of the Directore of the road. submitted the following report of the Chief Engineer, the reading of which he presented in a brief address setting forth the vital necessity of immediate

It was directed to make the permanent location to that law a law a point directly opposite of, and one half and the latest of the Mississippi river, and at all times easily accessible by steamboats, the line rune easierly accessible by steamboats, the line flower of divide features and the boild and the standard in a point.

The distance across the bottoms here, to the table and sense of the Transpelan River, is 8200 feat. From this point, the line was over an almost perfectly level or the distance of 12 miles to the bottoms on Black River, crossing these bottoms in 2% miles, near Lyfte's mile. Leaving Lyfte's, the line runs thence over an other and similar table, to its intersection with the Miwansker and has Crosse Railroad, in the valley of the La Crosse. The maximum grade on this like is 40 feat to the mile, and that for one mile only, in descending to Black river.

You will see from this, that as the greatest part of

feat to the mile, and that for one raise only in descends in to Black river.

You will see from this, that as the greatest part of your tine runs over these plateaus, which are about to feet above the level of the Mississipp river, the grading must necessarily be light, as their surface is only broken by sight nouthations.

The length of the line from the cart side of the Missispp river, opposite Wilsona, to its intersection with the Milwavice and In Crosse tailrond, so only 28 miles and 500 feet, 25% miles of which run over above cartirely teve plains, and along the side ritle, and will excavations being gravel, sand, and sand how. The remaining 1½ miles, for the purpose of leaving sufficient water-way in the Missisphy, Trempleau and Black Rivers, will require pile brilging, the material's for which can be had at the different places where these of purious court. these openings occur.

Bluck river will need a bridge of sufficient span (say 50 fest), to allow small rafts to ran through. The spans of the other bridges can be made of ordinary length, and according to the size and quality of the life but most convenient. timber most convenient.

The amount of work necessary to prepare the road.

or the trace, is as indicer:

S miles of light destring and grabbidg.
170,000 yards of excavation.
270,000 yards of ombankment. 100,000 yards of excavation, 275,000 yards of enhantment, 160 feet bridge scross B isck River. 20 culvents (see more particular and elaborate estimates field in the office of the Scoretary. The whole is estimated to cost \$65,000. Permit me to ray, that I was well pleased to observe, in connection with the great luverest manifested by the people of Whoma, that the lababilitants along the ing of our servey in Wiscondin, were fully alive to the importance of and the backits to be derived from the construction of the road, as was exhibited in the readiness with which they coded the right of way, and the Ocmpany may rely with confidence upon more available aid in its construction. All along the line of your road are numbrous and theirly strikinetts, in a rich and well settled country. Local characteristics, where it receives, via the Transit R. R., all the carrying trade of the Sate of Minnesota, would be sufficient to make the road remuterative, and are a certain guarantee of its carp construction.

All of which is respectfully subsoited.

Whooks, Sept. 1, 1560.

Winers, Sept. 1, 1560. The report was unanimously adopted. The Republican adds: The Republican adds:
Masses, D. S. Norton, Thomas F. Hennett, William Mitchell, and M. A. Dennett, were severally palied upon and addressed the meeting at longth and in strong terms of approval of the project under consideration. Each gentleman impressed upon the clittens of Williams the abjointe necessity, for the preservation of their increases that immediate and thorough action should be them to connect Wingda with the East by railroad.

In reference to Monday's market the Gazette says

BREADSTUFFS AND THE HARVEST IN ENGLAND,—The U.

The probability appears to be that whatever surplus grain we may have in this country will find a market in Great Britain, though not under the stimulus of a famine demand. It is not at all desirable for the general interests of the United S-acet shat our explose of breadends should be subjected to an extraordinary foreign drain. The thirty millions of our people have to be fed; and it is not well for the general trade of the country that they should be paying high prices for bread—a state of things are to be induced by an extraordinary foreign demand. The late news of improving haven proposed is not therefore so discouraging as one might suppose.
